PRO 10 SPECIFICATION SHEET

Our lowest sound reduction hearing protectors. Great for acoustic musicians, smaller ensembles and anyone exposed to moderate sound levels

SNR 12

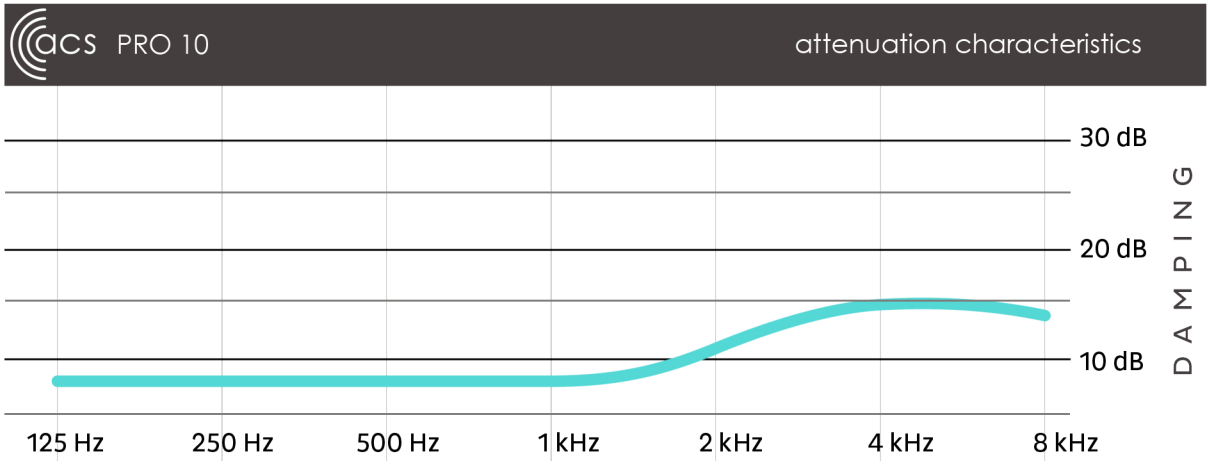
The revolutionary PRO series of hearing protectors enable you to play, produce and listen to music at safer volumes without making you feel isolated from your environment. Custom moulded to your ears, these professional hearing protectors are manufactured from soft, medical grade silicone. They are comfortable, discreet and are available in a wide range of colours and levels of attenuation (damping) to suit a wide range of ambient sound levels.

The PRO-10 filter delivers the lowest level of sound reduction in the PRO range. Designed specifically for classical and acoustic performers, the PRO-10 offers suitable protection for moderately noisy environments and where subtle changes in the music have to be heard. Its vented design helps in reducing occlusion giving a more natural response so you can concentrate on your performance.

PRO-10 will protect your hearing in noise levels of up to 90dB

Acoustic Specification

Minimum guaranteed damping level (dB)	125 Hz	250 Hz	500 Hz	1 kHz	2 kHz	4 kHz	8 kHz	H	M	L	SNR
PRO 10	8	8	8	8	11	15	14	12	9	8	12



Weight	3g Net | 83g Gross | Average weight will vary according to ear size
Build Material	40 Shore Medical Grade Silicone
Mould Type	Canal Mould
Standard Colour	Clear
Included Accessories	Instruction Leaflet, Wax Pick, Comfort Cream, Carry case
Optional Accessories	Neck cord, Grips
Package Dimensions	100mm x 55mm x 38mm
Warranty Period	1 Year against manufacturing and component failure

Attenuation is calculated according to CE norm EN 352-2 by ISO 4869.2 for high (H), medium(M), low (L) frequency level and as the single noise attenuation rating (SNR).
