

The PRO17 custom hearing protector is a great choice to wear in lower noise environments where protection is required but communication is still possible.

SNR 17

The PRO17 is our flattest and most natural sounding filter, providing even attenuation across the frequency range it allows the user to have natural conversation whilst protecting them from the noise.

PRO 17 is the perfect choice for anyone who needs to hear clearly in noise levels of up to 100dB.

PRO17 has been tested and certified to meet the European standard for hearing protectors, EN352-2. Full attenuation data and specification table is available below.
