

For use in very loud and challenging environments. Used by sound engineers, amplified musicians and venue staff.

SNR 27

The revolutionary PRO series of hearing protectors enable you to play, produce and listen to music at safer volumes without making you feel isolated from your environment. Custom moulded to your ears, these professional hearing protectors are manufactured from soft, medical grade silicone. They are comfortable, discreet and are available in a wide range of colours and levels of attenuation (damping) to suit a wide range of ambient sound levels.

The PRO-26 filter is designed specifically for musicians and vocal performers who are exposed to very high sound levels, The PRO-26 gives one of the most accurate responses of any hearing protector with almost level sound reduction across the frequency range, allowing you to hear the music as it should sound but just quieter with no loss of fidelity. Its vented design helps in reducing occlusion giving your voice a more natural sound so you can concentrate on your performance. Pro-26 will provide protection in sound levels of up to 110dB

Acoustic Specification

Minimum guaranteed damping level (dB)	125 Hz	250 Hz	500 Hz	1 kHz	2 kHz	4 kHz	8 kHz	H	M	L	SNR
PRO 26	25.9	25.4	26.6	24.2	26.2	25.5	32.1	25	25	26	27

Weight	3g Net 83g Gross Average weight will vary according to ear size
Build Material	40 Shore Medical Grade Silicone
Mould Type	Canal Mould
Standard Colour	Clear
Included Accessories	Instruction Leaflet, Wax Pick, Comfort Cream, Carry case
Optional Accessories	Neck cord, Grips
Package Dimensions	100mm x 55mm x 38mm
Warranty Period	1 Year against manufacturing and component failure
Tested to conform to EU Noise at Work Standard EN352-2	
Attenuation Determined by BSI Product Services (0086), Maylands Avenue Hemel Hempstead, Herts, HP2 4SQ
