

For use in very loud and challenging environments when maximum protection is required

SNR 27

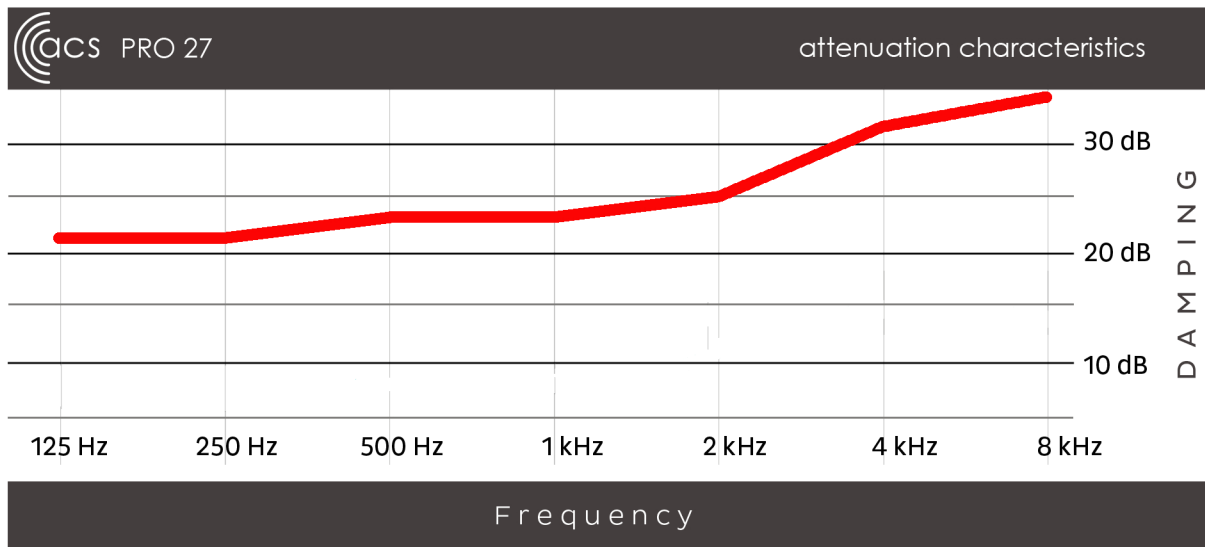

The revolutionary PRO series of hearing protectors enable you to play, produce and listen to music at safer volumes without making you feel isolated from your environment. Custom moulded to your ears, these professional hearing protectors are manufactured from soft, medical grade silicone. They are comfortable, discreet and are available in a wide range of colours and levels of attenuation (damping) to suit a wide range of ambient sound levels.

The PRO-27 filter delivers the highest level of sound reduction in the PRO range. Designed to offer protection in the highest noise levels, the PRO-27 is not suitable as a musician hearing protector but is used by crew and support staff who are confronted with loud stage volumes. PRO-27 is used widely by motorcyclists, shooters and in motorsport where high frequency reduction is essential.

PRO-27 will provide protection in noise levels of up to 112dB

Acoustic Specification

Minimum guaranteed damping level (dB)	125 Hz	250 Hz	500 Hz	1 kHz	2 kHz	4 kHz	8 kHz	H	M	L	SNR
PRO 27	22	22	23	23	25	32	34	27	24	23	27

Weight	3g Net 83g Gross Average weight will vary according to ear size
Build Material	40 Shore Medical Grade Silicone
Mould Type	Canal Mould
Standard Colour	Clear
Included Accessories	Instruction Leaflet, Wax Pick, Comfort Cream, Carry case
Optional Accessories	Neck cord, Grips
Package Dimensions	100mm x 55mm x 38mm
Warranty Period	1 Year against manufacturing and component failure
Tested to conform to EU Noise at Work Standard EN352-2	
Attenuation Determined by BSI Product Services (0086), Maylands Avenue	
Hemel Hempstead, Herts, HP2 4SQ
